Dimensions Financials

“Solutions beyond frontiers”

Dimensions Financial Software Consultancy Services Pvt. Ltd. is a part of the Dimensions Corporation equipped to provide value added software solutions and specialized consultancy in areas specific to Financial Sectors and Client Services. Solutions from Dimensions Financials addresses business needs by applying experience and expertise combined with the latest of technological additions to producing quality software with an excellence in service.

Vision

To provide scalable, reliable, secure and cost-effective financial software solutions

Mission

Create and distribute new financial products and reusable financial software modules using rapid application development, delivery methodologies and tools, which works independently or integrated with third party systems

The *e-Fin* Technology

Dimensions Financials believe that business applications model the real world that is independent of any platform or database. This view has led to the development of a unique object oriented architecture using the popular MVC model. A set of core objects and interfaces encapsulate the common functionalities where all applications are made as extensions to the core modules (SOA).

Dimensions *eFin* is a web based application and also a web application development framework. It comprises of a set of core components, which can be extended to build any web based application so quickly. The basic set is a group of common components required to build any web application and the financial core is a set of banking components.

Salient features of *eFin* products:

- Complete Web based application
- Works with browsers like Mozilla, Netscape, Firefox and IE
- Database independent with easily extensible modules
- Centralized control using TPS
- Real Time Transaction Processing
- Configurable Desktop and Quick Menus through user interface
- Configurable products with support for multiple currencies
- Inbuilt access/transaction logging and history management
- Support for multi-stage transactions (entry/authorize)
- Implementation of complete business cycle
- Ability to work with other core banking systems using web services
- Built in audit trails, uses open standards like Java/J2EE
- Built in reporting engine to generate reports in PDF/EXCEL/HTML
- Includes an integrated interest/profit calculator

The *eFin* core include modules for User Management, Organization Management, Module Management, Basic HR, Secure Internal Mail, Application Setup and Configuration, Task Management, Software Development and Deployment Tools, Reporting Tools and Multi-stage Transaction Processor.

The Financial core includes modules like Client Management, Accounts Management, Transaction Management, Limit Management, Cheques Management, Customer Charge, Interest and Interest Rates, Collateral Module, Insurance Module, Fixed Assets and Financial Reports.

Core Banking Dimensions

The *eFin* technology advantage from Dimensions Financials will ensure Banking and Financial institutions to meet their business challenges with more vigor and confidence. The Dimensions Financial products are built on top of the *eFin* Financial Core inheriting all the properties and features of the *eFin*.

Dimensions Financials core banking modules include:

- Deposit Products (SB/CD/Call) Module
- Term Deposit Module
- Locker Module
- Loans (Home Loan, Vehicle Loan, Salary Loan, Commercial Loan)
- Teller Module
- General Fund Transfer Module
- Financial Reports (Balance Sheet, P & L, Statement of Account)

Islamic Banking Dimensions

Islamic Banking from Dimensions Financials is the banking concept in compliance with the *Sharia* principles from the holy book *Quran*. This unique accounting system is rapidly expanding in countries like Malaysia, Bahrain, U.A.E., Kuwait, Qatar, Saudi Arabia, South Africa, Switzerland and U.K. amongst others.

Islamic Banking Dimensions from Dimensions Financials provides highly customizable *Sharia* based accounting concepts followed by a full-fledged accounting system. Our expertise in Financial Consulting to Banks and Financial Institutions with a strong overseas support and presence makes Dimensions Financials your best choice for Islamic Banking Solutions.

FRM Dimensions

Financial Risk Management is the management of exposure to risks using financial instruments. Sound risk management at banks within a country is a pre-requisite for a stable financial system. Therefore the Basel Committee on Banking Supervision introduced a set of general guidelines to regulators on how to control systemic risk and avoid bank failures. The latest of which (the Basel II accord) is an international standard which defines how much capital should banks need to put aside to guard the bank against credit, market and operational risks.

According to Basell II, there are three lines of defense represented by the three pillars for effective Financial Risk Management.

- Pillar I where Bank assesses and measures minimum capital requirements based on regulatory guidelines.
- Pillar II that deals with regulatory overview
- Pillar III is all about disclosure of risk information

Basel II

Dimensions Financials offers a set of risk assessment tools for Banks to manage and report credit, market and operational risks based on Basel II framework.

Credit Risk
